JULY 2024

## CAMPUS HIGHLIGHTS

### Orientation Day

Students come from various schools and diverse backgrounds, and they get aligned with the institution's vision. Orientation is organised to give an insight of the coming academic year and the role of them as students that needs to be followed. It gives direction to the students of the path that they have chosen for their future.

They get clarity on their coursework and academia and the various activities that this vibrant campus has to offer. This, in a way, charts the path for the next 2 years. They forge bonds with their classmates, seniors and teachers who become important to them as mentors and guides. This campus is their home-away-from-home and the orientation is especially important to give them a nourishing environment.

## CCG - Career Counseling Guidance

CCG sessions are held on a weekly basis for all classes to give students a glimpse of the career interests that they have. The campus not only guides students for the 2 years that they spend here but also prepares them for what's beyond. CCG is where students understand the plethora of options available to them after they graduate. The campus has a well qualified and experienced counselor who guides us in all our endeavours.

## CULTURE AT CAMPUS

Over the past month, CMR NPU has engaged students in a number of activities, some of which are 'Social Contract', 'Morning Assembly', etc.

### Social Contract:

Moving into a new college is the beginning of another chapter in a student's life, leaving behind familiar faces and their comfort zones. In order for the students to adapt with the new environment, we conduct 'Social Contract' to encourage students to fraternise with each other. It also helps to set expectations and necessities not only from their classmates, but also from their teachers. It teaches our students the idea of, 'treating others the way you want to be treated', with dignity, honour and respect. It also teaches us to mutually agree on people's beliefs and opinions without overstepping boundaries.

### Morning Assembly :

The students of CMR start their day with a very positive mindset, looking forward to what a new day brings. The college choir enlightens the students with a 'Sanskrit hymn' that teaches students about gratefulness and contentment.

We also give the students a glimpse of the daily national and international affairs. We conclude the assembly with an optimistic thought, often quoted from great notable minds.

## LEARNING BEYOND THE CLASSROOM

### Work Exposure Program

This April, the Work Exposure Program launched CMR NPUC students into the real world. Partnering with 25 local businesses, we offered 130 internships and job shadowing opportunities. Students gained a taste of diverse careers, honing essential skills like workplace dynamics, teamwork, and communication. A total of 97 students completed the program, reporting a major confidence boost and a clearer vision for their future. The program provided students with a firsthand look at various fields such as engineering, medicine, law, commerce, and arts.

## Student Council Activities

At CMR NPUC, democracy rocked the house as the student body elected a phenomenal new student council team. By nominating themselves – passionate students from both first and second PU volunteered, eager to champion our school community. The competition was fierce! These candidates battled it out through rigorous interviews, showcasing their vision, leadership, and unwavering dedication to CMR NPUC’s core values. But the wait is over! Get ready to meet your new student council superheroes – a team poised to represent their peers, collaborate with faculty, and make this year at CMR NPUC the most epic one yet. Stay tuned for their official introduction!

## PROFESSIONAL DEVELOPMENT

The 'Professional Development Institute' team is tasked with supporting our educators through the year.

All our Pre-University Educators underwent rigorous training covering curriculum, instruction, culture, and more, to be prepared for delivering excellent learning in their classrooms. Our educators are also working to set their personal and professional goals with their school leadership.

We are excited about the new academic year and the opportunities it brings. Together, we look forward to achieving new milestones and fostering a thriving learning environment for all our students.

## LEARNING & INSIGHTS

### Mood Boards, Stick-y towers & paper tables

Students learn to pay attention to their surroundings which becomes a source of inspiration for them. Deep observations of different objects help them capture the play of light and shadow visually. They learn to present the objects as they see them. Students explore different materials to build models. They understand and apply the various concepts and principles that guide the making of the models.

## Learning Area Visual Arts & Makery

The visual art and makery curriculum is designed to nurture students' creativity, imagination, and artistic expression while encouraging hands-on experimentation and innovation. Through a combination of visual arts and making activities, students explore various mediums, techniques, and materials to develop their artistic skills and engage in the process of creating. The curriculum emphasises the importance of visual literacy, allowing students to understand, interpret, and communicate through visual means. They learn to analyse and appreciate different art forms, styles, and cultural contexts, broadening their understanding of the visual world around them.

## STUDENT EDGE

### Embracing New Beginnings: My Journey as a Fresher at CMR PU College

Being a new student at CMR PU College is both exciting and transforming. Since the first step I took on this campus, I sensed myself looking forward to this new chapter of my academic career with great enthusiasm.

The college had an immediate positive impact on me due to its liveliness and amazing facilities. One of the most remarkable things about being a fresher in CMR PU College is the friendly atmosphere. The teaching staff and the senior students are very free and approachable, making it easier to adjust from school life to college.

The orientation program also informed us about clubs, activities and other important rules and regulations about the college. Scholastically, it provides an environment that stimulates learning.

This makes us think creatively and critically because there is a wide assortment of subjects taught at this institution that emphasises both practical and theoretical approaches.

Teachers at CMRPU are not only reading out of the book but are also enthusiastic about their teaching thus making classes interesting and educational.

Also, besides academics, CMR PU College presents numerous opportunities for co-curricular activities.

From sports to cultural events or even student groups, everyone stands a chance here. These undertakings improve talents while fostering new friendships as well as leaving undeniable marks in our lives.

As a fresher, there are moments of uncertainty and nervousness, but they are outweighed by the excitement of new experiences and the possibilities that lie ahead.

The supportive community at CMR PU College ensures that every student feels valued and motivated to achieve their best.

Overall, being a fresher here is about embracing new challenges, growing academically and personally, and enjoying every step of the journey.

## LEADERSHIP BLOG

### Transforming Education: The Impact of Digital Technology

Technology has driven humans through progress and shaping the modern world. Though we have various developments in the technological fields. Digital technology has changed education practice and encouraged education systems worldwide. Making it single.

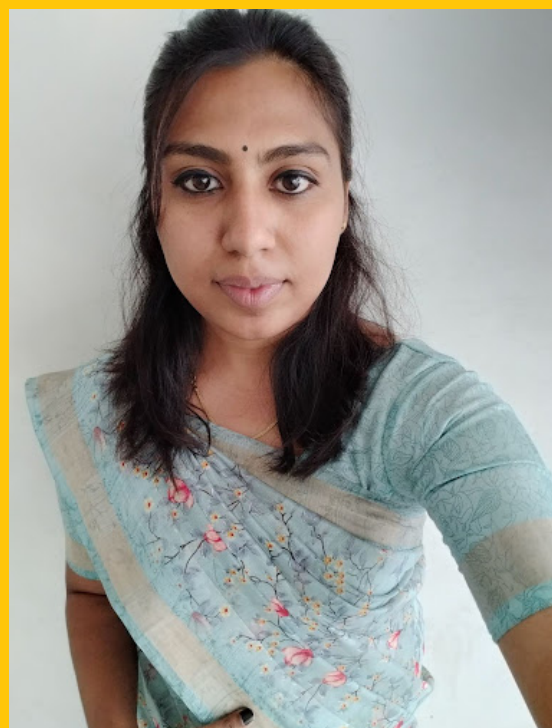

The internet and digital libraries provide students and educators with vast amounts of information and resources, breaking down geographical barriers and democratising education.

Technology in education has profoundly transformed teaching and learning processes enhancing accessibility and efficiency.

Assistive technologies, such as speech-to-text, screen readers, and specialised software, support students with disabilities, ensuring inclusivity in education.

Adaptive learning technologies use data to pass educational content to individual students and help them to identify their strengths and weaknesses and provide customised learning methods.

Not only the students get the advantageous source even the educators stay upgraded to the latest teaching methods and handling technologies like Online resources, webinars, and virtual conferences. Technologies fostering continuous professional growth.
